

Riley Dorrington

Software Engineer | Full-Stack

New Port Richey, FL | (607) 744-2617 | rwdorrington@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

U.S. Citizen | Eligible to Obtain Security Clearance | Open to: Tampa Bay / Hybrid / Remote / Open to Relocation

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS, Java, C++, Bash, TypeScript, PHP, C#

Frameworks & Libraries: Flask, Node.js, Bootstrap, React, Selenium, SQLAlchemy, Tailwind, Next.js

Tools & Platforms: Git, Docker, GitHub Actions, Linux, VS Code, MySQL, PostgreSQL, Azure, OpenAI API, Anthropic API, Google Gemini API, LLM Agents, Prompt Engineering, REST APIs

Software Engineering: Object-Oriented Programming (OOP), Design Patterns, Data Structures & Algorithms, Unit Testing, Integration Testing, CI/CD, Agile/Scrum, SDLC, Software Architecture, RESTful API Design

PROJECTS

Severe Weather Event Reporter - Automated Analysis Pipeline | [Live Demo](#) | [GitHub](#) | 2026 - Present | Python, FastAPI, Py-ART, MetPy, JavaScript, Tailwind

- Built automated analysis pipeline integrating 8 federal data sources (NEXRAD Level II radar, NWS warnings, NCEI storm surveys, SPC outlooks, upper-air soundings) with fallback chains and data-quality flagging to resolve conflicting source records.
- Processed raw radar sensor data with Py-ART to extract event features (velocity couplets, echo tops, max reflectivity per volume scan); computed warning lead-time metrics.
- Designed date-based feature gating with graceful degradation to generate reports from partial historical data; validated against events (Joplin 2011, Greenfield 2024), reducing multi-hour manual analysis to ~3 minutes.

Job Board Aggregator - Production ETL Pipeline & Web App | [Live Demo](#) | 2025 - Present | Python, JavaScript, GitHub Actions

- Architected a multithreaded ETL pipeline using Python concurrent.futures, extracting and indexing 1,000,000+ active listings from 20,000+ companies across major ATS platforms with error handling and logging for failed extractions.
- Designed chunked gzip data architecture (~25k jobs/chunk) with Web Worker-based decompression for progressive client-side loading and fast initial render.

AI Dev Orchestrator - FastAPI Code Quality Agent | [GitHub](#) | 2026 | Python, Anthropic/OpenAI APIs, pytest

- Built a provider-agnostic AI agent that audits FastAPI codebases, identifies defects, and generates pytest coverage through a tool-use loop with confidence-gated mutations (under \$0.20 per full pass).
- Designed AST-based scanner to ground the agent in real code structure; human-in-the-loop review surfaces low-confidence changes. Detected 4 of 5 planted bugs, generated 17 passing unit tests.

GearScan - Vision Model Benchmarking App | [GitHub](#) | 2026 | React Native, Node.js, PostgreSQL, Google Gemini API

- Built golden-dataset test harness to evaluate failure modes across model and resolution configurations; performed root cause analysis on misclassifications and selected production config at 87.8% accuracy and \$0.0029/request via measured cost tradeoffs.
- Designed full-stack image-identification service with tier-based model routing, Google OAuth + JWT auth, rate limiting, and Postgres-backed search history; integrated eBay pricing API for market valuation.

Provisio Hotel Booking Platform | [GitHub](#) | 2023 | PHP, JavaScript, SQL

- Full-stack booking platform built in a multi-developer Agile/Scrum team with weekly sprints and daily stand-ups.

EDUCATION

Georgia Institute of Technology: M.S. in Computer Science (OMSCS, Online) | Starting Fall 2026

Bellevue University: B.S. in Software Development | GPA: 4.00 | Sep 2023

Broome Community College: A.A.S. in Computer Information Systems | GPA: 3.62 | Aug 2021

EXPERIENCE & VOLUNTEER WORK

United States Postal Service - Assistant Rural Carrier / Rural Carrier Associate | Nov 2024 - Mar 2026 (intermittent) | Binghamton, NY | Odessa, FL

- Delivered mail across assigned routes while maintaining accuracy, accountability, and adherence to schedules.

Humane Society - Volunteer | Binghamton, NY | May 2023 - May 2025
