

# Riley Dorrington

## Software Engineer | Full-Stack

New Port Richey, FL | (607) 744-2617 | rwdorrington@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

U.S. Citizen | Eligible to Obtain Security Clearance | Open to: Tampa Bay / Hybrid / Remote / Open to Relocation

## TECHNICAL SKILLS

---

**Languages:** Python, JavaScript, SQL, PHP, HTML, CSS

**Familiar With:** Java, C++, Bash

**Frameworks & Libraries:** Flask, React, Node.js, Selenium, OpenAI API, Google Gemini API, LLM Integration

**Tools:** Git, Docker, GitHub Actions, Azure, MySQL, Linux, REST APIs, VS Code

**Practices:** Agile/Scrum, CI/CD, RESTful API Design

## PROJECTS

---

**Job Board Aggregator - Production Data Pipeline & Web App** | [Live Demo](#) | 2025 - Present | *Python, JavaScript ES Modules, concurrent.futures, GitHub Actions, Docker, SQL*

- Architected and deployed automated job aggregation pipeline (CI/CD via GitHub Actions) indexing 1,000,000+ active listings from 20,000+ companies across major ATS platforms (Greenhouse, Lever, Ashby, Workday, etc)
- Designed chunked gzip data architecture (~25k jobs/chunk) with Web Worker-based decompression for progressive client-side loading and fast initial render.
- Built advanced filtering and classification engine with keyword-weighted experience tagging (intern → senior), regex filtering, URL state persistence, and localStorage-based tracking.

**AI Dev Orchestrator - FastAPI Code Quality Agent** | [GitHub](#) | 2026 | *Python, Anthropic/OpenAI APIs, pytest*

- Built provider-agnostic AI agent that audits FastAPI codebases, generates docstrings and pytest coverage, and fixes trivial bugs through a tool-use loop with confidence-gated mutations (less than \$0.20 per full pass).
- Designed AST-based scanner to ground the agent in real code structure, preventing hallucination; human-in-the-loop review surfaces low-confidence changes. Demonstrated on sample app: identified 4 of 5 planted bugs, wrote 17 passing tests.

**Discord Media Aggregation Bot** | [GitHub](#) | 2024 - Present | *Python, Selenium, yt-dlp, Azure, Docker*

- Built and deployed a Discord bot for automating subreddit scraping and media delivery via yt-dlp, supporting downloads from arbitrary URLs across most major video/image hosts - reducing curation from hours to minutes.

**GearScan - Vision Model Benchmarking & Full-Stack App** | [GitHub](#) | 2026 | *React Native, Node.js, PostgreSQL, Google Gemini API*

- Built golden-dataset eval harness benchmarking Gemini Flash vs Flash Lite across resolution and reasoning configs; selected model at 87.8% accuracy and \$0.0029 per request based on measured accuracy/cost tradeoffs.
- Architected full-stack image-identification service with tier-based model routing, Google OAuth + JWT auth, rate limiting, and Postgres-backed search history; integrated eBay pricing API for market valuation.

**Provisio Hotel Booking Platform** | [Bellevue University Capstone](#) | 2023 | *PHP, JavaScript, SQL*

- Designed and implemented full-stack hotel booking platform with secure reservation management; collaborated in multi-developer Agile/Scrum team with weekly sprints and daily stand-ups.

## EXPERIENCE

---

**United States Postal Service** - Assistant Rural Carrier / Rural Carrier Associate (Federal Employee) | Nov 2024 - Mar 2026 (intermittent) | *Binghamton, NY | Odessa, FL*

- Delivered mail across assigned routes under strict daily deadlines
- Maintained accuracy and accountability handling sensitive federal mail

## VOLUNTEER EXPERIENCE

---

**Humane Society** - Volunteer | Binghamton, NY | May 2023 - May 2025

- Provided animal care and facility support at local animal welfare nonprofit over two years.

## EDUCATION

---

**Georgia Institute of Technology:** M.S. in Computer Science (OMSCS, Online) | *Starting Fall 2026*

**Bellevue University:** B.S. in Software Development | GPA: 4.00 | Sep 2023

**Broome Community College:** A.A.S. in Computer Information Systems | GPA: 3.62 | Aug 2021
